

SRM Pilot™

Situational Awareness Rebuild Tool

Deliberately restoring perception and mental models

Purpose

To help pilots detect and recover from degraded situational awareness.

Rebuild Prompts

What is actually happening right now?

What has changed since my last assessment?

What am I assuming that may no longer be valid?

What am I missing or not actively monitoring?

Use When

After plan changes, when something feels 'off', or during rising workload.

Key Principle

Situational awareness must be actively rebuilt, not assumed.
