

SRM Pilot™

## Plan B Trigger Questions

Preserving options before decisions narrow

### Purpose

To normalise early Plan B thinking and interrupt continuation bias.

### Trigger Questions

If this trend continues, what is my next option?

When will Plan A stop being viable?

What would make me uncomfortable if this worsened?

What decision would be harder if I wait longer?

### Use When

During planning, marginal conditions, or rising time pressure.

### Key Principle

The safest Plan B is identified early — not urgently.
